PROJECTS / OPEN-SOURCE

Resume Web Screening Application | Link   *Flask,Flask_wtf,wtforms,PyPDF2*
   Resume Web Screening Application which helps HRs to identify best candidates based on the given Job
   description based on BERT Model Training.

Github Complex Repository Analyzer | Link   *Python,Flask,PyTorch,HuggingFace*
   The GitHub Repository Analyzer is a web application that analyzes the technical complexity of GitHub
   repositories and provides insights on their complexity. It uses a pre-trained language model to evaluate
   repository names and select the most complex one. Additionally, it generates a justification for the
   selection using the language model.
